

Forward-Looking Statements; Non-GAAP Financial Measures

This presentation contains forward-looking statements within the meaning of the U.S. Securities Exchange Act of 1934 and the Securities Act of 1933. The forward-looking statements include statements concerning, among other things, our future business model and strategies, our financial model and structure, market and market share growth, industry trends, customer demand and growth opportunities. In some instances, you can identify these statements by forward-looking words, such as "may," "might," "will," "could," "should," "expect," "plan," "anticipate," "believe," "estimate," "predict," "intend" and "continue," the negative or plural of these words and other comparable terminology. The target financial model described in this presentation is intended to aid in the evaluation of long-term potential, and is not guidance or a statement of forecasted performance in a specific future period. The forward-looking statements are only predictions based on our current expectations and our projections about future events. All information and forward-looking statements included in this presentation and the related discussions are based upon information available to us as of August 18, 2020. You should not place undue reliance on these forward-looking statements. These forward-looking statements are subject to known and unknown risks, uncertainties and other factors that may cause our actual results, levels of activity, performance or achievements to differ materially from those expressed or implied by these statements, including risks related to technology and market trends; the benefits of acquisitions and investments; macroeconomic conditions; uncertainties related to the COVID-19 pandemic and the impacts of our responses to it; the interpretation and impacts of changes in export controls and other trade barriers; our success in executing our business strategies and other risks discussed in the section titled "Risk Factors" and elsewhere in our Annual Report on Form 10-K for the year ended December 28, 2019 and in our other filings with the U.S. Securities and Exchange Commission copies of which may be obtained by visiting the Investor Relations section of our website at <http://investors.formfactor.com> or at www.sec.gov.

This presentation and related discussions contain non-GAAP measures relating to our financial performance. These measures may be different from non-GAAP financial measures used by other companies. The presentation of this financial information is not intended to be considered in isolation of, or as a substitute for, financial information prepared and presented in accordance with generally accepted accounting principles. You can find the reconciliation of non-GAAP financial measures to the most directly comparable U.S. GAAP measures in the Supplemental Information contained in this presentation.

Market leader in large and growing semiconductor test and measurement sector

Benefits from powerful secular trends:

- Exponential growth in semiconductor content, increased 5G and data center spending
- Adoption of advanced packaging to counter slowdown in Moore's Law

Technology leadership enables customers' most critical roadmap advancements, from R&D through Production

Profitable financial model with earnings growth and strong cash flow

Active execution of acquisition strategy increases scale and diversification

Customers Rate FormFactor One of THE BEST Suppliers in the Semiconductor Industry

FormFactor Selected as a Top Supplier in Annual VLSIresearch Survey

May 13, 2020 16:30 ET | Source: FormFactor, Inc.

LIVERMORE, Calif., May 13, 2020 (GLOBE NEWSWIRE) -- FormFactor, Inc. (NASDAQ: FORM), a leading semiconductor test and measurement supplier, announced that it has once again been named a 10 BEST and THE BEST Supplier in VLSIresearch's annual customer satisfaction survey in three categories:

- **10 Best Focused Suppliers of Chip Making equipment,**
- **THE BEST Suppliers of Test Equipment, and**
- **THE BEST Suppliers of Test Subsystems.**

The survey includes the feedback of worldwide semiconductor manufacturing companies, rating suppliers in 14 categories, and measuring in each - supplier performance, customer service and product performance. The results mark seven consecutive years that FormFactor has been selected in THE BEST Suppliers of Test Subsystems which includes manufacturers of probe cards, test sockets and device interface boards. In April, the company was also ranked as the world's top supplier of semiconductor probe cards in a separate VLSIresearch report*.

"Customers give FormFactor high rankings for trust in supplier and technical leadership," said G. Dan Hutcheson, CEO of VLSIresearch. "... FormFactor continues to be a five-star supplier."

Trusted by leading semiconductor designers and foundries

How FormFactor Wins

Early Customer Engagement
Creates Competitive Advantage
and High Barriers to Entry

Technology and Applications
Leadership Relied Upon
by Customers

Deliver Market-Leading
Products with World-Class
Cycle Times and Quality

Largest R&D Budget in
Served Markets, Enabled
by Industry-Leading Scale

FormFactor Occupies a Unique Place in Semiconductor Industry

Front-End: Wafer Fabrication Equipment

Industry: \$55 Billion

- 6% CAGR
- Highly cyclical, tied to capital spending
- Highly consolidated

Wafer Test & Measurement

Industry: \$1.9 Billion

Advanced Probe Cards: \$1.5B; Engineering Systems: \$0.4B

- 6% CAGR for Advanced Probe Cards, device-specific consumables
- 3% CAGR for Engineering Systems, driven by R&D budgets
- Demand driven by design releases on both new and existing nodes
- Moderate cyclicity
- Consolidated industry

Back-End: Wafer Assembly and Final Test

Industry: \$3.5 Billion

- 7% CAGR
- Highly cyclical, tied to capital spending
- Highly fragmented

Customers' shorter product cycles and faster times-to-market amplify secular growth in silicon devices

Drivers of Shareholder Value Creation

Revenue Growth

- Underlying growth in semiconductor applications
- Participation in Advanced Packaging and 5G mega trends
- Diversification of customers

Operating Leverage

- Gross Margin expansion
- Disciplined operating structure
- Robust Operating Cash Flow and Free Cash Flow
- Profitable growth

Capital Allocation

Focused reinvestment

- R&D
- Capacity expansion
- Fund organic growth

M&A

- Increase served addressable market
- Acquire attractive technologies
- Patient, deliberate approach
 - Complementary to organic growth
 - Diversifies revenue stream
 - Accretive to earnings

Revenue Growth Drives Increased Profitability

Non-GAAP Gross Margin

Improving operating efficiency and factory utilization will drive gross margin expansion

Capital Expenditures to Support Organic Growth

	2017	2018	2019	2020	Target CapEx Model
CapEx	\$18M	\$20M	\$21M	\$50M-\$60M Capacity Expansion	\$30M - \$35M
Revenue	\$548M	\$530M	\$590M		\$850M
CapEx as % of Revenue	3.2%	3.8%	3.5%		3.5%-4.0%

New Livermore Facility

Highly Automated Manufacturing

Factory Expansions

Acquisition Strategy Adds Scale and Diversification

Established process focused on extending long-term industry leadership

- Acquisition priorities
 - Market leader in growing market
 - Compelling technical capabilities
 - Accretive
 - Focus on tuck-ins as well as larger scale companies
- Leveraging FormFactor's key capabilities and infrastructure to achieve synergies

Opportunistic acquisition of Advantest's probe card assets aligned with our long-term strategy and M&A principles

- Provides critical enabling technology reinforcing FormFactor's leadership
- Creates potential opportunity to increase share in the NAND Flash probe card market

Proven track record of identifying and integrating accretive acquisitions

Year: 2012
Amount: \$117M

Year: 2016
Amount: \$352M

Year: 2019
Amount: €19.7M

Acquisition of Advantest's probe card assets

Year: 2020
Amount: \$35M

Highly Resilient Business Model

Enabled by Flexible Cost Structure

- 100% of employees with variable pay component
- Flexible staffing model

Strong and Healthy Balance Sheet

- Supported by strong free cash flows
- History of successfully managing debt and significant borrowing capacity available if needed

About Non-GAAP Financial Measures

We believe that the presentation of non-GAAP earnings per fully-diluted share, free cash flow and other non-GAAP measures in this presentation provides supplemental information that is important to understanding financial and business trends and other factors relating to our financial condition and results of operations. These non-GAAP measures are among the primary indicators used by management as a basis for planning and forecasting future periods, and by management and our board of directors to determine whether our operating performance has met certain targets and thresholds. Management uses non-GAAP operating income (loss), non-GAAP earnings per fully-diluted share and other non-GAAP measures when evaluating operating performance because it believes that the exclusion of the items indicated herein, for which the amounts or timing may vary significantly depending upon our activities and other factors, facilitates comparability of our operating performance from period to period. We use free cash flow to conduct and evaluate our business as an additional way of viewing our liquidity that, when viewed with our GAAP results, provides a more complete understanding of factors and trends affecting our cash flows. Many investors also prefer to track free cash flow, as opposed to only GAAP earnings. Free cash flow has limitations due to the fact that it does not represent the residual cash flow available for discretionary expenditures, and therefore it is important to view free cash flow as a complement to our entire consolidated statements of cash flows. We have chosen to provide non-GAAP information to investors so they can analyze our operating results closer to the way that management does, and use this information in their assessment of our business and the valuation of our company. We compute non-GAAP operating income (loss) and non-GAAP fully-diluted earnings per share by adjusting GAAP operating income (loss) and GAAP earnings per fully-diluted share to remove the impact of certain items and the tax effect of those adjustments. These and other non-GAAP measures are not in accordance with, or an alternative to, GAAP and may be materially different from other non-GAAP measures, including similarly titled non-GAAP measures used by other companies. The presentation of this additional information should not be considered in isolation from, as a substitute for, or superior to, operating income (loss) or earnings per fully-diluted share and other measures prepared in accordance with GAAP. Non-GAAP financial measures have limitations in that they do not reflect certain items that may have a material impact upon our reported financial results. We may expect to continue to incur expenses of a nature similar to these non-GAAP adjustments, and exclusion of these items should not be construed as an inference that these costs are unusual, infrequent or non-recurring.

For more information on non-GAAP measures and adjustments, please see the Supplemental Information in this presentation and available at <http://investors.formfactor.com> for reconciliations of non-GAAP financial measures to the most directly comparable GAAP financial measures.
